

ATTENTION: STATION MANAGERS

SUBJECT: IBS STATION COOPERATION WITH THE ARMED SERVICES ON THE CAMPUS.

Your cooperation with the representatives of the Armed Services stationed on your campus is needed. As noted in the last IBS Bulletin, several IBS Stations are already cooperating by offering the facilities of their stations to the Special Services Officers in residence. These stations are now producing special programs for the trainees.

If you have not already done so, it is suggested that you contact the Special Services Official at your college as soon as possible. Put certain program times at his disposal, to provide for special messages and programs to the trainees over your station. Army officials have indicated to IBS their interest in seeing your facilities put to such use for the duration.

* * * *

The Radio Section of the Army has agreed to supply IBS Stations with special transcribed programs prepared for men overseas. Subject to the approval of the American Federation of Radio Artists, IBS will probably be the only group of radio stations within the United States to whom these programs will be made available. The programs will be ready by April 15, and further information concerning them will be sent to you before that time.
